Homework – Malala Class

Date Set: Friday 30/9/22

Due Date: Wednesday 5/10/22

Dear Parents and Carers,

It has been a lovely full week in Malala class. Not only have we started a new topic of suspense writing in English, but the children have completed some wonderful newspaper articles in RE, detailed diagrams of the circulatory system in Science and tackled the challenging task of passing backwards in tag rugby!

The homework this week is to continue with our Science topic of 'The Circulatory System'. This week, you learnt about the lungs, heart, arteries and veins. Can you remember what they do? **I would like you to design a poster/create a leaflet/draw a diagram explaining how these elements of the human body work!** Make sure the facts are correct but be creative with your end product! There are some websites below that might help (always check with an adult at home first). Good luck!
